

## THE EXCHANGE AT 100 FEDERAL STREET IDEAS2 AWARD PRESENTATION

An angular plate steel and glass prism, inspired by a folded piece of graph paper, makes quite the entrance at the 100 Federal Street office building in the heart of Boston's Financial District. Known as The Exchange at 100 Federal Street, the entry pavilion is a sharply faceted form with an exposed steel structure, whose main rib plates form the structure's main lateral load resisting system. The project was one of this year's AISC IDEAS2 Merit Award winners. Join us for a presentation on the project as we honor various companies involved in its design and construction.

### About Your Host

The American Institute of Steel Construction (AISC), headquartered in Chicago, is a non-partisan, not-for-profit technical institute and trade association established in 1921 to serve the structural steel design community and construction industry in the United States.
